9. Tool Design & Manufacture

Image file name: Velocity Tool Design Manufacture

Velocity has earned the trust of the toughest, most demanding customers in the business—mold by mold. We are the people our customers trust with their most difficult and demanding tooling and mold component needs. We combine an experienced design and engineering team with highly advanced technology along with the best-in-class equipment in the industry.

10. Injection Molding

Image file name: Thermoplastics_2

Insert molding, over-molding, two-shot molding, micro-molding, high-volume molding or metal injection molding (MIM) – at Velocity we do it all and we do it better. We combine experienced design, tooling, and engineering teams with highly advanced technology to bring you the foremost injection molding programs in the industry.

11. Cleanroom Molding

Image file name: Thermoplastics_1

Cleanroom molding is manufacturing plastic parts in an ISO certified room designed to reduce the risk of loose particulate contamination. Many industries require specialized parts created in a cleanroom environment for added safety and precaution.

12. Dry Swiss Machining

Image file name: Dry Machining

Velocity continues to build its reputation for innovative manufacturing solutions for our customers. Dry machining (Coolant-free) is considered the cleanest manufacturing technique and a requirement in today's Class II and Class III medical device manufacturing industry.

13. Precision Swiss Machining

Image file name: Precision Machining

Velocity offers high-precision CNC Swiss Machining to support all industries, including medical device, aerospace and defense, and the industrial sector. Swiss machines are ideal for medical device manufacturing as they provide high-speed production with extreme accuracy, delivering repeatable results for precise manufacturing requirements.

14. Precision Machining

Image file name: Precision Machining_Industrial

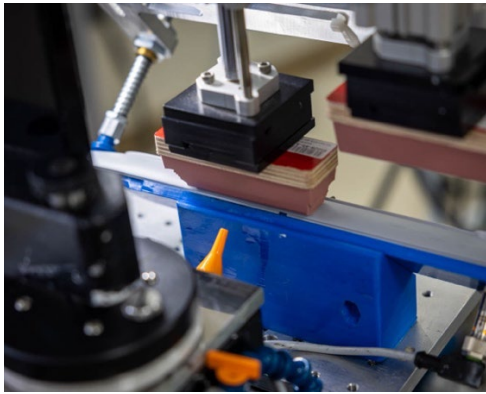

Velocity has a variety of machining capabilities that allow us to fabricate complex geometries to tight tolerances. We serve a wide range of industries including, but not limited to, medical, aerospace, defense, electronics and consumer products.

15. Contract Manufacturing – Secondary Operations

Image file name: Secondary Ops

Whatever you are looking for in an outsourcing partner, you will find at Velocity. Our state-of-the-art facility with commensurate equipment, reliable record of performance, vertically integrated capabilities that support your needs, experienced and highly talented work force and program management team allow you to focus on what you do best. Velocity is the leading contract manufacturer for medical device, electronics, defense and industrial markets.

16. Contract Manufacturing - Pad Printing

Image file name: Velocity Pad Printing

Whatever you are looking for in an outsourcing partner, you will find at Velocity. Our state-of-the-art facility with commensurate equipment, reliable record of performance, vertically integrated capabilities that support your needs, experienced and highly talented work force and program management team allow you to focus on what you do best. Velocity is the leading contract manufacturer for medical device, electronics, defense and industrial markets.

17. Cleanroom Contract Manufacturing

Image file name: Cleanroom

Whatever you are looking for in an outsourcing partner, you will find at Velocity. Our state-of-the-art facility with commensurate equipment, reliable record of performance, vertically integrated capabilities that support your needs, experienced and highly talented work force and program management team allow you to focus on what you do best. Velocity is the leading contract manufacturer for medical device, electronics, defense and industrial markets.

18. Quality Assurance

Image file name: Quality Assurance

Velocity recognizes that uncompromising quality is imperative to the success of our customers. The world's leading medical device companies collaborate with Velocity for the design and production of complex medical device components. Our rigorous quality system drives every aspect of the process, from supplier selection, inspection, and documentation to product validation.
